ERTA NATURALIST

1986 - 1990

5 YEAR INDEX

ALBERTA NATURALIST

FIVE YEAR INDEX 1986-1990

Published by the Federation of Alberta Naturalists
Box 1472, Edmonton, Alberta T5J 2N5
F.A.N. Office (403) 453-8629

Patron:
Hon. Dr. J.W. Grant MacEwan

The Federation of Alberta Naturalists is composed of natural history clubs from across the province. The aims of the Federation are:

(a) To encourage among all Albertans, by all means possible, an increase in their knowledge of natural history and understanding of ecological processes;
(b) To promote an increase in the exchange of information and views between natural history clubs and societies in Alberta;
(c) To foster and assist in the formation of additional natural history clubs and societies in Alberta;
(d) To promote the establishment of natural areas and nature reserves, to conserve and protect species, communities or other features of interest;
(e) To organize, or coordinate, symposia, conferences, field meetings, nature camps, research, and other activities whether of a similar of dissimilar nature;
(f) To provide the naturalists of Alberta with a forum in which questions relating to the conservation of the natural environment may be discussed so that united positions can be devleoped on them, and to provide the means of translating these postions into appropriate actions.

The Alberta Naturalist: 1986-1990

by J. Derek Johnson
7109 - 106 Street
Edmonton, Alberta
T6E 4V5

The Alberta Naturalist (A.N.) completed its twentieth volume in 1990. In December of 1989 an index to the A.N.'s first ten years, compiled by Martin McNicholl, was published. A second index, covering the period from 1981-85, and following the same general outline used by McNicholl (1989), was compiled by Robert Greggs and published in 1990. The present index covers Volumes 16-20 (1986-90), again following the format used by McNicholl (1989). I was the editor for Volumes 16-18; Anna Robertson edited Volumes 19 and 20. Included in the index are the proceedings of an Urban Natural Areas Workshop held at the University of Calgary in January of 1987 and published as Vol. 17 No. 3 of the A.N. These proceedings were edited by Dave Ealey.

Perusing this latest index reveals that aside from business items and conservation issues, the A.N. has settled into a magazine that devotes most of its articles to vascular plants, birds, and mammals. Articles on the lower vertebrates, particularly the reptiles and amphibians, the invertebrates, and lower plants are few in number. Recent contributions by Junior Naturalists are conspicuous by their absence.

The latter part of the 1986-90 period saw a flurry of activity with regard to the number of corporate member clubs in F.A.N. The Alberta Native Plant Council, based in Edmonton, and the Vermilion River Naturalist Club, in Vermilion, became corporate members in 1990. In early 1991 the Grasslands Naturalists of Medicine Hat and the Peace Parkland Naturalists of Grande Prairie became corporate members. Currently, there are 12 corporate member clubs in F.A.N. It is hoped that the newly-formed Ft. McMurray Field-Naturalists' Society will soon make it 13. The Beaverhill Bird Observatory joined F.A.N. as an associate member in 1988 and continues as such. This broadening of the membership base can only help to make F.A.N. a stronger and better representative of the naturalist community in Alberta.
